

**With Recent protester activity estimated to  
have cost London businesses **£72 million****

**How can organisations best mitigate the risks to their business continuity?**

## Technical Protester Removal Capability

POLARM International Ltd provide specialist Protester Removal operational teams to support the lawful eviction of individuals who are refusing to move. This requires specially qualified and trained resources who are able to use a variety of equipment and tools in order to access protesters who may be up trees, underground or have placed "lock-owns", large tubes filled with a variety of substances on their arms to hinder removal.

We are aware that each the protester threat to each organisation is different and will also vary over time. We have therefore created service options to suit these differing needs in terms of level of response and training.
